

BARNCRAFT®

Wall Planks, Sliding Doors & Hardware

GLASS★CRAFT®
DOOR COMPANY

WHY BARNCRAFT®?

BarnCraft sliding doors are made by GlassCraft Door Company, an award-winning residential door manufacturer based in Houston, TX. GlassCraft brings its manufacturing and service excellence into producing this premium selection of sliding doors made of Mahogany, Knotty Alder, Knotty Pine, MDF, Metal and Birch. Offering premium products with numerous options at an affordable price, BarnCraft is a unique brand in the market. A harmony of design, craftsmanship, durability and affordability, BarnCraft provides an excellent choice for that perfect sliding door.

ABOUT GLASSCRAFT®

GlassCraft Door Company, founded in 1977, is an award-winning manufacturer of premium wood, composite and steel doors. From its 205,000 square foot manufacturing facility in Houston, Texas, GlassCraft's team of dedicated artisans, designers and master craftsmen create a distinctive selection of the most beautiful doors, decorative glass windows and entryways available. This dedication to excellence is built into each product and continues with industry leading customer service and product warranties.

Cover: 36" wide x 96" tall Contemporary Metal 6 Lite 1 Panel design (see page 41), with Black Gage hardware and Cloud glass.

This photo: 54" wide x 84" tall Two Panel Knotty Alder Barn Door (see page 27) with Owl Grey Antique finish, Vintage sliding hardware, and Gila pull handle.

Opposite page: 42" wide x 84" tall Rustic Farmhouse barn door in the Chevron 1 design (see page 38), with Vintage sliding hardware and a 24" Gila pull handle. Photo also features BarnCraft "Peel-n-Stick" Rustic Farmhouse wall planks (see pages 4-5).

4 STEPS TO CREATING THE PERFECT SLIDING DOOR

1. Select your door configuration.

Single, double or shutter door? Bypass Double or Quadruple? Refer to the configuration information on pages 6-7 to help select your sliding door installation type.

2. Select your door.

The BarnCraft Collection offers eight different sliding door series in this catalog featuring various door designs, glass and finish options. This includes the Knotty Pine Barn Doors, Knotty Alder Barn Doors & Shutters, Iron Plank, Carved MDF, Contemporary Metal & Glass, Contemporary Birch, Mahogany & Glass Doors, and the new Rustic Farmhouse Series. Visit www.glasscraft.com to view other GlassCraft doors that may be used for sliding door applications.

3. Select your sliding door hardware.

Choose from eight heavy-duty metal sliding hardware options with black or stainless steel finish options (select designs). All BarnCraft sliding hardware include nylon wheels for a quiet-glide operation (see page 8).

4. Select your options.

Consider adding these functional and decorative options to your BarnCraft sliding doors:

- Soft-Close option for a smoother and safer open/close operation of the sliding doors (see page 10).
- Pulls and Handles in black and stainless steel finish (see pages 14-15).
- Header boards for added structural support (see page 11).
- Select decorative rustic wall planks to complement your sliding door (see pages 4-5).

All photos, drawings, and product designs in this catalog are copyright ©2021 GlassCraft Door Company, Houston, Texas. BarnCraft, GlassCraft, GlassCraft Door, GlassCraft.net, and the GlassCraft logo are all registered trademarks. BarnCraft® “Peel-n-Stick” Rustic Farmhouse Planks

Decorative Rustic Wood Panels for Walls

Real wood – real rustic – real easy! You’ll be amazed at how simple it is to give one or more rooms in your home a quick makeover by adding the trendy farmhouse aesthetic of rustic wood planking to your walls. BarnCraft planks are 5” wide, high-quality, peel-n-stick planking offered in 8 designer finish colors (see next page). Made of real Canadian pine wood, the planks are 1/4” thick (not including the pre-applied, peel-n-stick tape). This makes the product lightweight and easy to work with for a fast installation process. It even makes clean up a breeze. Anything is possible with Rustic Farmhouse Planks, just use your imagination on the unique applications you can try, such as headboards, wainscoting, table tops, etc.

Renovate a Room with a Peel-n-Stick Wood Wall

Your options are limitless when working with our Rustic Farmhouse Wall Planks. Think of all the ways to transform your home by adding accents to your interior with an easy do-it-yourself project that will look like it was done by a professional. Simply, clean your wall, peel the tape, and start sticking! (Please note, your wall must be clean and flat for good adhesion). Planks may be secured with small brads or finishing nails if required. Planks are sold by the box (1 square meter per box — 10.76 square feet in seven, 5” x 46.5” planks which may be cut as needed). Use a “J-Roller” during installation for best results.

Rustic Farmhouse Doors to Match

The same Rustic Farmhouse Wall Planks are used to create our new Rustic Farmhouse door collection (found on the cover and in section 6 of this catalog). We make it uncomplicated and affordable to create a design-inspired room by coordinating an accent wall with one of our beautiful Rustic Farmhouse sliding doors to match!

Rustic Farmhouse Samples

A sample box containing each of the 8 wall plank colors (shown on the next page) is available for customers. Please keep in mind that our planks are made of real wood and finished by hand, therefore the colors and markings will vary from the colors pictured and within each plank in each box.

Rustic Farmhouse wall planks in Barnwood, Riverwood, Stormy Grey and Weathered Brown shown here to complement the 42” wide x 96” tall Rustic Farmhouse Horizontal 1 Door (page 39) with Royal hardware and Monterey pull handle.

BarnCraft® “Peel-n-Stick” Rustic Farmhouse Wall Planks

BarnCraft Rustic Wall Plank

- 7 pieces per box
- Real wood wall planks – kiln dried Canadian pine
- Planks are 5" wide by 46.5" long x 1/8" thick
- Peel-n-stick tape on back
- 1 square meter – 10.76 square feet per box
- 8 colors available – 1 color per box
- Use for: wall covering, head boards, barn doors, wainscoting, table tops, picture frames, etc.
- Same colors as used in the Rustic Farmhouse Collection barn doors on pages 36-39
- Actual colors of these Rustic Wall Planks will vary between boards, and from the colors shown here, as this is a natural, hand-finished product.

Plank back - with peel-and-stick adhesive for easy installation.

SINGLE & DOUBLE DOOR CONFIGURATIONS

Single Door Installation

The single door installation may be used when there is sufficient wall space to the right OR the left of the wall opening that is at least 6" wider than the actual wall opening. For instance, if your wall opening is 36" wide, then you must have at least 42" of available wall space to the right or to the left of the wall opening.

Consider an extra-wide single door if you have a wider sized opening that has sufficient wall space. If wall space is available on BOTH sides of the opening, you might want to consider a double door installation. Alternatively, if there is little or no wall space on EITHER side of the wall opening, then you might consider the double BYPASS door installation.

Double Doors Installation

The double door installation may be used when this double door gives the desired appearance and when there is sufficient open wall space on both sides of the door opening. We suggest that this available wall space should be at least 2" wider than half the width of the opening. For example, if your opening in the wall is 60" wide, then half of this measurement is 30". And you should have at least 32" (30" + 2" allowance) of wall space both to the right side and to the left side of the opening.

For a double door installation, you will need 2 doors and 2 sliding door hardware kits. The rails from each of the 2 kits meet in the center above your wall opening. The Double Door Rail Connector (see page 10) is an available option that mounts across the joined ends of the 2 door rails for a seamless double door configuration.

BYPASS DOUBLE/QUAD & WINDOW/TV CONFIGURATIONS

Window Shutter Installation/ TV Cabinet Installation

The Knotty Alder Barn Doors & Shutters Series offers a wide range of size options to cover unique openings and spaces, such as windows and TV cabinets. Use of sliding doors as shutters add a unique design focal point and tie in the interior design of any room. See pages 25-27 (Barn Door Series) and 28-29 (Iron Plank Series) for a wide selection of sizes available.

Barn doors for TV cabinets can be used in place of traditional cabinet doors for a unique twist. This installation saves on the swinging space and provides a functional and stylish design element. With a wide range of minimum and maximum sizes available, BarnCraft's barn doors offer a complementary design detail to suit your home.

Bypass Double or Quadruple Doors Installation

The Bypass door installation may be used when this is the desired appearance and when there is INSUFFICIENT wall space to the right AND/OR the left of the wall opening for a traditional barn door installation. A double bypass installation uses two sliding door tracks instead of one. The second door track is cantilevered in front of the first track. So the doors roll in front and behind of each other.

For a Bypass Double door installation, you will need 2 doors, 2 sliding door hardware kits plus 1 bypass rail bracket kit (see page 12). For a Bypass Quadruple door installation (such as shown on the right), you will need 4 doors, 4 sliding door hardware kits, plus 2 bypass rail bracket kits. Visit www.glasscraft.com to view the bypass quadruple door installation video.

BARNCRAFT SLIDING DOOR HARDWARE

Premium Hardware Options

SLADE STAINLESS STEEL HARDWARE KIT
BDHA01SSK100 - 100" Rail
BDHA01SSK78 - 78-3/4" Rail

HARDWARE KIT PARTS

All Hardware features **ADJUSTABLE RAILS** and **QUIET-GLIDE** wheels

Steel mounting rails include an adjustability feature that allows the rails to be perfectly leveled after installation to the walls. Installation of the rails can be difficult to ensure that the rails are perfectly level. But with this new feature, each rail can be fine-tuned for levelness after the rails have been mounted to the header or directly to the wall. This is an exclusive feature and benefit of BarnCraft sliding door hardware.

Premium Features:

- Rollers glide quietly and smoothly on ball-bearings.
- Made of high quality powder-coated steel in black finish with stainless steel options.
- 2 rail lengths available: Choice of 78-3/4" or 100".
- Weight capacity: 220 lbs.
- Kits include the rollers, rail, stoppers, screws & nuts, anti-jump discs, floor guide and installation guide.
- Rollers are available individually and separately from the kit. See page 8 and refer to the online catalog for more information.

Hardware Kits - Adjustable Leveling Rails

Each **HARDWARE KIT*** includes the following:

- A Stand-off Bracket (x5)
- B Rail (x1) – (see page 10)
- C Floor Door Guide (x1 pair)
- D Bolt (x5)
- E Bolt Wall Anchor (x5)
- F Log Bolt (x5)
- G Log Bolt Wall Anchor (x5)
- H Roller (x2) – (see page 8)
- I Stopper (x2)
- J Anti Jump (x2)
- K Allen Wrench (x1)
- L 45 mm Roller Bolt (x6)
(For use on doors thinner than 1-3/4")

Optional:

See pages 13-15 for optional Locks, Handles, and Wall-mount floor guide.

* See page 8 for complete kit information.

BDPART1	Includes all screws, 2 Anti Jumps (J), 1 Floor Guide pair (C), for black rollers
BDPART1SS	Includes all screws, 2 Anti Jumps (J), 1 Floor Guide pair (C), for stainless steel rollers
BDPART2	Includes 2 stoppers (I), and Allen Wrench (K), for black rollers
BDPART2SS	Includes 2 stoppers (I), and Allen Wrench (K), for stainless steel rollers
BDPARTS3	Includes (6) 45 mm Roller Bolts with washers (L), for black rollers (For use on doors thinner than 1-3/4")
BDPARTS3SS	Includes (6) 45 mm Roller Bolts with washers (L), for stainless steel rollers (For use on doors thinner than 1-3/4")

SOFT-CLOSE OPTION FOR SLIDING DOOR HARDWARE

New Improved Soft-Close Option

The Soft-Close option is available for all Sliding Door Hardware Kits.

The soft-close option is an impressive addition to your sliding door installation. Hidden from view, this mechanism ensures a quieter and safer operation of your sliding door by automatically slowing the opening or closing action. No more slamming or jamming issues. Perfect for homes with children, elderly, or those who want ease of use. Packaged 2 per box (one for opening, one for closing), these options attach by set screws directly to the back side of the rail. Consider these product features:

- Allows for a safer and smoother operation of the sliding door by automatically slowing the door as it glides gently and quietly into the closed or open position.
- Helps to prevent slamming and accidental jamming of fingers.
- Reduce noise with silent closing/opening action. Ideal for bedroom, bathroom and office installations.
- Use with any of the 6 Black finished sliding door hardware options on page 8. Available in Black finish only.
- Use one for closing action, and a 2nd to open.

SOFT-CLOSE KIT - BDSC (kit includes all parts needed)

Please visit www.glasscraft.com to view a video of the Soft-Close option in action.

Double Door Rail Connector

Consider installing a Rail Connector with your double doors to seamlessly join 2 rails together, end-to-end. The 2 rails appear as one continuous track for a more polished look. Available in black and stainless steel.

BDRC – Black

BDRCSS – Stainless Steel

Door Rail Options

The metal rail used in the BarnCraft door installation is a very heavy duty solid steel flat bar 1-1/2" in height and 1/4" thick. One rail is needed for every door, so a double door installation needs 2 rails. The rail length depends upon the width of the door. The wider the door, the longer the rail needed.

HEADER BOARD OPTION FOR BARNCRAFT INSTALLATION

Header Board Options

Installing a Header Board with the BarnCraft hardware kit adds structural support.

The BarnCraft hardware kit is best installed with a header board for added structural support (see examples shown throughout the catalog). With this option, the sliding door hardware is mounted directly to the header board, and the header board mounts to the wall. This method ensures that you can secure this assembly directly into wall studs.

You may use any wood or plywood material for a header board. The Rustic and Barnwood header boards listed below are produced from Knotty Alder and will match your Knotty Alder door. Available finished or unfinished. The White header board option uses a solid wood board with a white thermoformed laminate that can be used white or painted.

BYPASS OPTION FOR BARNCRAFT INSTALLATION

Bypass Door Option

The Bypass door installation may be used when there is INSUFFICIENT wall space to the right AND/OR the left of the wall opening. A Bypass Installation uses 2 sliding doors and 2 sliding door tracks instead of one. The second door track is cantilevered in front of the first track, so the doors slide in front of and behind each other.

See more about this on page 7. These kits are available in black finish and stainless steel.

For a Double Bypass door installation, you will need 2 doors, 2 sliding door hardware kits plus 1 of these Bypass Rail Bracket Kits (5 brackets per kit). For a Quadruple Bypass door installation (as shown on page 7), you will need 4 doors, 4 sliding door hardware kits, plus 2 of these bypass rail bracket kits.

Bypass Rail Bracket Kit

BDDPRX Black finish (Set of 5 brackets)

BDDPRSSX Stainless Steel finish (Set of 5 brackets)

Note: Vintage Slider Kits are not compatible with the Bypass Bracket Kits.

Left image above: Edge view of double bypass door installation without header. A header may be used which would be installed behind both the inner rail hardware and the outer rail hardware. Black Finish.

MORE OPTIONS FOR BARNCRAFT INSTALLATION

Floor / Wall Guide Options

Every BarnCraft hardware kit includes a "Floor Guide" (at near right). Replacements may be purchased individually. The optional Wall-Mounted Guide shown at far right mounts to the wall (not the floor). This guide is an option and not included with the hardware kits. May be used for full size doors, or for small shutter doors, with the wall-mounted floor guide higher on the wall. Both types are adjustable for different door thicknesses.

BDFG
Floor Guide (replacement for kits – sold individually)

BDWM
Wall-Mounted Guide

Privacy Locks

BarnCraft doors may be installed with a locking system for privacy. Specially designed for the BarnCraft Sliding Doors, the privacy lock is made of premium quality steel. Two colors are available: black powder coated steel or stainless steel. Includes all screws and parts required for installation. Boxed individually.

Two sizes are available - Regular and Large. Both will work on all doors, but the Large lock looks and may function better with large doors over 28 square feet. The Regular lock measures about 1.75" x 2.25". The Large lock measures about 3" x 3.25".

Note: GlassCraft will not prep the doors for these locks, as the lock location varies for each specific installation.

BARNCRAFT DOOR HANDLES

Black Pull Handles

Vista (left, 8" tall) - HP4
Prospect (right, 8" tall) - HP26

The black handles shown on this page are made of real handwrought iron that is durable, heavy, and complements any design theme, together with your choice of BarnCraft door and sliding hardware. As these handles are all hand-made, their size and appearance will vary slightly. All are packaged with mounting screws.

The VISTA mounts flush with the face of the door, and requires a mortise pocket be cut or chiseled into the door for installation. The PROSPECT is 1/4" thick, and mounts directly on the door face, and does not require a mortise pocket. The other handles shown below extend above the face of the door, and can only be mounted on the door face away from the wall. The Vista or Prospect may be mounted on the "back" side of the door. The 12" pull handles directly below are designed to be mounted with the Vista or the Prospect on the "back" side of the door, as the screw holes for each align, but they also may be used separately (without Vista or Prospect).

Refer to our BarnCraft Product & Information Guide for more detail.

12" Pull Handles for 8" Vista or Prospect plate mount

The 5 pull handles at right may be used with or without the Vista pull or Prospect plate, with the 12" handle on the front of the door, and the Vista or Prospect on the back side.

BARNCRAFT DOOR HANDLES

Stainless Steel Pull Handles

Vista (Right) (8" tall) - HP4S
Prospect (Left) 8" tall) - HP26S

The stainless steel handles shown on this page and throughout this catalog are made of real stainless steel. As these handles are all hand-made, their size and appearance will vary slightly. All are packaged with mounting screws.

The VISTA pull (shown at near left) and the PROSPECT pull (far left) mount on the face of the door. The Vista requires a mortise pocket be machined or chiseled into the door. The PROSPECT is 1/4" thick, and mounts directly on the door face, and does not require a mortise pocket. The Metro handles extend above the face of the door, and can only be mounted on the door face away from the wall. The Vista or Prospect may be mounted on the "back" side of the door. The Metro is mounted with screws from the back side of the door, which will be visible on the back side.

The 12" and 16" Metro pull handles are designed to be mounted with the VISTA or the PROSPECT on the "back" side, as the screw holes for each align, but they also may be used separately (without the Vista or Prospect).

Refer to our BarnCraft Product & Information Guide for additional specifications and information.

Metro Stainless Steel:
Available in 12", 16", 48", or 60" tall.

TWO FINISH OPTIONS FOR THE BARN DOOR COLLECTION

Barnwood Knotty Alder and Rustic Knotty Alder Textures/Finishes

Unfinished Barnwood Knotty Alder

Option 1. Barnwood Knotty Alder features a distinctive weather-worn Knotty Alder texture with enhanced distressed marks for an authentic barn door look. This high definition texture is available unfinished (raw wood) or showcased beautifully in four factory finish stain options (see below), and heavily textured with knots, occasional holes and/or distress and machine marks. The Barnwood finish is irregular in stain, color and appearance, and features a more heavily textured grain than the Rustic Knotty Alder finish. All colors feature a hand-applied color finish to the natural Knotty Alder wood, which is then distressed with additional distress marks to simulate worm holes, cracks, splits, and wear marks. This finish does not include any clear top coat, so the colors are flat with no sheen or shine.

Unfinished Rustic Knotty Alder

Option 2. Rustic Knotty Alder features the natural rustic patterns and textures of Knotty Alder as the Barnwood, but without the rough weathered look included in Option 1 above. This Rustic Knotty Alder option is not "smooth" however, and features the occasional "mill mark" and knot hole. This texture is available unfinished (photo at left is the unfinished raw wood) **or** factory finished in several colors as shown on the next 3 pages. The Traditional colors include the Rustic Knotty Alder texture, the stain color, and a clear urethane satin-sheen top coat. The Antique colors (page 18) are darker, and suggest an aged appearance, and the Distressed colors (page 19) add faux worm holes and cracks to the Antique option for a more rustic aged look. (Distressed and Antique are the same color).

Option 1: Barnwood Texture finish color options

Coal Grey

White Wash

Driftwood

Ranch Brown

NOTE: The images throughout this catalog showing prefinish options offer an indication of final appearance, but due to variations in the texture, grain and color of the wood, the actual appearance will vary.

HOW TO ORDER THE BARNCRAFT DOOR & INSTALLATION VIDEOS

Measuring for your BarnCraft Door

Determine the minimum door width:

To determine the minimum door width, measure the distance between the inside frame opening and add 2" to each side ($A + 2" + 2" = \text{minimum door width}$). This will allow the door to cover the frame opening when the door is fully closed.

Determine the minimum door height:

To determine the minimum door height, measure between the finished floor and the frame, then subtract 1/2" for floor clearance from the bottom of the door ($B - 1/2" = \text{minimum door height}$). Door may cover the existing door top casing trim if desired, or you may want your door taller than the existing opening. Add on to your door height for this.

Check for minimum door clearance:

A minimum clearance of 6-1/2" (C) is required, measuring from the top of the door to the ceiling, to accommodate the track and sliding hardware. The top of the door should be level with, or above the frame opening.

A minimum clearance of available wall space **equal to the actual door width plus 2"** (D) is required for the door to completely roll free of the door opening.

Video Installation Guides:

ADDITIONAL INFORMATION

Warranty

The BarnCraft Collection is backed by our guarantee of craftsmanship and premium quality. GlassCraft offers a limited 1 Year door warranty on all BarnCraft sliding doors.

GlassCraft also provides its BarnCraft hardware with a guarantee of durability. Produced with strong steel and quiet-gliding operation, the BarnCraft sliding door hardware comes with a limited 5 Year warranty.

Visit www.glasscraft.com for more information.

BarnCraft Door Dimensions

- A – Tongue-and-groove Plank 6" width
- B – Cross Rail 8" height (Plank style doors only)
4" height (Panel style doors)
- C – Vertical Brace 4" width (Panel style doors only)
- D – Horizontal Brace 4" height (Panel style doors only)
- E – Diagonal Brace 4" width

FAQs:

1) **What is the thickness of the Barn Doors?**
3/4" thick doors + 1" thick rails for a total door thickness of 1-3/4" for the Pine or Knotty Alder Barn Door series. Other door series vary in door thickness. Check corresponding section pages.

2) **How do we determine which track length is needed?** We recommend the 78-3/4" track for door width of up to 36". For door widths of 38" up to 48" wide we suggest the 100" rail length. Double doors or by-pass doors require more than 1 rail.

3) **Will the Hardware work with other doors that GlassCraft offers?** Yes. Visit www.glasscraft.com to view other doors.

4) **Is the hardware all metal and are the rollers Nylon?** The wheel part of the rollers are a Nylon material which provides the Quiet-Glide benefit. All other parts are powder-coated solid metal. Wheel axles include ball-bearings.

5) **What does the back of the barn door look like?** The Pine or Knotty Alder Barn Door series are constructed from planks of Pine or Knotty Alder wood or Knotty Alder Barn Wood. The back side will be stained or painted in the same finish as the front. If the doors come with rails or braces, these pieces will be on the front side where the rollers are facing. The MDF door series is available with the Design on 1 side only, or both sides.

6) **What are the dimensions of the knotty alder barn doors?** See the diagrams at left. Other door series have different dimensions. The Iron plank doors all use 6" planks. The MDF doors, birch doors, and Mahogany doors all vary according to door width, height, and design.

36" wide x 96" tall Rustic Knotty Pine Double Z Two Panel Barn Door shown here with Slade hardware and Corona pull handle.

RUSTIC KNOTTY PINE

The Knotty Pine Barn Door Collection is available in unfinished (no paint or stain) only. These true plank doors are the most economical of all of the BarnCraft doors. Knotty Pine features random knot holes, mineral streaks, and the occasional check or minor crack. 3/4" thick planks: 1-3/4" thick at cross rails.

Available in 8 door designs and two heights.

These Pine Barn Door Series may be ordered in any of the 8 styles in either 7'0" or 8'0" heights.

These doors are only available unfinished, ready for your paint or stain. Doors will require sanding prior to your finish process.

These doors are also available in a kit that includes the black SLADE hardware (see next page).

KNOTTY PINE BARN DOOR COLLECTION

BARNCRAFT PREMIUM SLIDING DOORS

PINE BARN DOOR & HARDWARE KIT

In Stock and Ready-to-Ship!

This kit includes a 36" wide pine door and Slade hardware kit, plus other bonus components that make for an easy and ready-to-install product.

PREMIUM FEATURES:

- Includes a stainable, ready-to-paint Knotty Pine barn door showing a mid-rail design on Side 1, and a one-panel design on Side 2.
- Available in 7'0" or 8'0" height, and 36" wide.
- Includes high-quality Slade black hardware kit with 78-3/4" long steel rail and all required mounting hardware. Door is pre-drilled specifically for the Slade hardware.
- Includes matching unfinished header for a more secure mounting and easier installation.
- 8 Doors in One! Includes bonus wooden parts that are sanded and pre-cut to configure the doors in any of the barn door designs below.
- Smart Packaging: All included pieces fit into one ready-to-ship, secure box with hardware components packed individually inside.

8 Doors in 1! Use bonus pre-cut bars to configure the barn door in any of these designs:

8'0"

7'0"

Side 1

Side 2

7'0" Quick Ship Kit (Includes 36" Knotty Pine unfinished door, Slade hardware kit, header, bonus pre-cut bars, mounting screws and bolts)

8'0" Quick Ship Kit (Includes 36" Knotty Pine unfinished door, Slade hardware kit, header, bonus pre-cut bars, mounting screws and bolts)

60" x 96" Rustic Knotty Alder door with Double X Barn Door design, Natural Distressed finish, Waggoner hardware and Gila 24" pull.

RUSTIC or BARNWOOD

The Alder Barn Door Collection is available in two different Knotty Alder textures. Rustic texture Knotty Alder is available in Unfinished, Traditional, Distressed and Antique finish options. Barnwood texture Knotty Alder features specialty finishes and heavy distress marks for an authentic weathered barn wood look and design. 3/4" thick planks: 1-3/4" thick at cross rails. See pages 26-27 for available door styles, sizes, details and options.

RUSTIC KNOTTY ALDER

BARNWOOD KNOTTY ALDER

The Barn Door Design Series features Knotty Alder wood in two textures: Rustic Knotty Alder with the characteristic closed pore graining and natural wormholes, pits, and crack patterns; and the Barnwood Knotty Alder with enhanced distressed markings and a more pronounced, raised grain for an authentic weathered barnwood look. Available in 8 door designs and various sizes.

All doors in this series use real 6" wide Pacific Northwest American Knotty Alder tongue-and-groove wood planks that are 3/4" thick. The 1" thick wooden cross rails or slanted rails are mounted on one side of the door and not on both sides. Total door thickness at rails is 1-3/4". See page 21 for more barn wood dimensions and details.

The Barn Door Series may be ordered in 6" width increments, from 24" wide up to 84" wide, while heights are available from 36" up to 96" in 2" increments. Not all of the 8 door profiles are available in all sizes.

CARVED MDF

The MDF Door Collection is produced using MDF (Medium Density Fiberboard) which has been router-carved to make beautiful door designs. Doors are primed in smooth white or are available with a 3D laminated texture. Doors are 1-1/8" or 1-1/2" thick, and may be ordered with the design on one or both sides of the door. See pages 34-35 for available door styles, details and options.

PAINTABLE

PRIMED WHITE MDF

36" wide x 96" tall BarnCraft MDF door in the Brentwood design (page 34) with a Mimosa wood grain 3D laminate, Vintage sliding hardware and a Gila 24" pull handle.

MDF COLLECTION

BARNCRAFT PREMIUM SLIDING DOORS

THE **MDF** DOOR COLLECTION

MDF Doors in primed white or textured 3D laminates

The MDF BarnCraft Collection features 1-1/8" or 1-1/2" thick doors that are produced using MDF (Medium Density Fiberboard). These doors are certified to CARB standards. They are all available with a white primed finish, to which you should apply your own paint color. Or you may select one of 19 colors of textured 3D laminate (see next 2 pages).

MDF doors are available with the door design router-carved on the front side only, or on both sides of the door.

Textured 3D laminate doors include black "T-moulding" applied to the 2 long vertical edges of the door. Primed white doors do not include this moulding.

All BarnCraft door hardware may be used on these doors, see page 8 for available BarnCraft sliding hardware options.

MDF doors are available in 3 door heights: 80", 84", and 96", and in 4 widths: 32", 36", 42", and 48".

There are 14 different MDF door designs available, each in 12 different sizes and 20 different colors and textures.

Photo: Detail of the beautiful wood grain texture, and the black T-moulding on the edge of all textured 3D laminate doors.

Photo (top, right): 36" wide x 96" tall BarnCraft MDF Shaker 5 Panel door with Gemstone Alpine 3D laminate, Gage stainless steel sliding hardware, and Metro pull handle.

Photo: Shown with 36" wide x 96" tall BarnCraft MDF Two Panel Chevron door (page 34) with Esterel 3D laminate, Slade stainless steel sliding hardware, and Vista inset pull handle.

MDF Door Textured 3D Laminate Colors

There are 19 textured 3D laminate options for the MDF series of doors are shown on this page and the next. Any of these textures and colors may be selected for any of the 14 MDF doors shown on pages 34 and 35. Samples of each color are available.

Wood Grain Textures. The 12 colors below are all 3D laminates that include a simulated wood grain texture. Colors with a "*" after the name incorporate a slight wood grain tactile feel. Colors with "***" after the name have a heavier, more rustic wood grain feel.

RUSTIC FARMHOUSE

The Rustic Farmhouse Door Collection features rustic wood planks adhered to one or both sides of a solid door. Produced using an engineered door core, these barn doors are dense, heavy and long lasting. The added real wood planks are produced from strong Canadian pine and are available in eight distinctive colors (see page 5). The Rustic Farmhouse Door Collection can be coordinated with our matching Rustic Farmhouse Wall Planks (see pages 4-5). Get inspired and imagine all the creative ways you can showcase these products in your home based on your own unique design style.

42" wide x 96" tall Rustic Farmhouse door with Chevron 1 design (see page 38), black Vintage sliding hardware and Tucson pull handle. Plank colors used are Weathered White, Charcoal Dusk, and Cloudy Grey.

RUSTIC FARMHOUSE COLLECTION

BARNCRAFT PREMIUM SLIDING DOORS

THE RUSTIC FARMHOUSE DOOR COLLECTION

Natural Wood Plank Design

Each Rustic Farmhouse door is approximately 1-1/2" thick with the 2 vertical edges of the door covered with a thin black molding. The plank designs may be added to one or both sides of the door. Doors with planks on both sides are thicker than those with planks on one side. Doors are available in 1-color or multi-color combinations (see next page).

All sliding door hardware options are available for all doors in this series. See page 8 for all hardware designs (hardware not included with the purchase of this door and should be ordered separately).

The Rustic Farmhouse Collection doors are available in 3 door heights: 80", 84" and 96", and in up to 4 door widths: 32", 36", 42", and 48".

- Available pre-finished only
- Real wood planks made from kiln dried Canadian pine
- Four different door designs
- Solid Core doors
- Sliding hardware sold separately

MODERN BIRCH

The Contemporary Birch Collection features solid doors with four minimalist designs in premium Birch wood. The collection includes Brentwood, Westwood, Fleetwood, and Inglewood designs, and offers a choice of multiple stain options that bring out the understated elegance of these doors.

Complement these birch contemporary sliding doors with either black or stainless steel hardware. Please see page 8 for all available BarnCraft sliding hardware options. All doors in this series are available assembled only.

These doors are all 1-3/4" thick. The birch wood and pattern detail are on both sides of the door.

Minimalist Modern Design

Birch wood is a creamy white sap wood with some golden brown flame patterns and has a warm and pleasing appearance. It has a fine, uniform texture with closed pores. Birch wood is a strong and very stable wood with beautiful grain patterns that highlight any stain color. Birch also provides an excellent surface for paint finishes.

36" x 96" Inglewood sliding door, shown here prefinished in Natural Traditional option, with Gage sliding hardware and Vista inset pull handle.

CONTEMPORARY BIRCH COLLECTION

BARNCRAFT PREMIUM SLIDING DOORS

THE CONTEMPORARY BIRCH BARNCRAFT COLLECTION

Birch Stain Finish Options

Twenty-seven factory finish color options are available for all Birch Collection doors. These doors are available unfinished **or** factory finished in 27 colors as shown on pages 17-19. The Traditional colors on Birch include the stain color and a clear urethane satin-sheen top coat. The Antique colors are darker, and suggest an aged appearance. The Distressed colors are the same as the Antique, with the addition of faux worm holes and cracks for a more rustic aged look.

The doors are available with the routed design or mirror available on 1 side or both sides of the door.

The mirror option is available in 2 widths (36" or 42"), and in 3 heights (80", 84", or 96"), and includes a 28" wide safety glass mirror. Mirror is 68" high on a 80" or 84" tall door, and 80" high on a 96" tall door.

ELEGANT MAHOGANY

The Glass & Mahogany Door Series in the BarnCraft Collection is available in Mahogany wood with choice of Traditional, Distressed or Antique finish - or unfinished. Mahogany is a fine straight-grained wood that ranges from rich golden to deep brown color and has a beautiful sheen when finished. See pages 17-19 for available finish colors.

36" x 80" Continental 3 Lite sliding door with Charcoal finish color, Large Flemish glass, Slade hardware, and Monterey pull handle.

MAHOGANY & GLASS DOOR COLLECTION

BARNCRAFT PREMIUM SLIDING DOORS

THE GLASS & MAHOGANY DOOR BARNCRAFT COLLECTION

Timeless Design

The Mahogany Door Series of BarnCraft sliding doors include these Mahogany doors with glass, in 2 door size options and up to 4 glass texture options. Choose from raw unfinished wood or 27 stain colors with Traditional, Distressed or Antique finishing options (refer to pages 17-19 for finish options). Mahogany varies from rich golden to deep brown colors and has a straight to wavy, even graining that has a beautiful sheen when finished.

See page 8 for the BarnCraft sliding door hardware options in black and stainless steel to complement the various sliding doors in this Glass & Mahogany Door Series.

Glass texture options are shown below.

These doors are all 1-3/4" thick. The Continental Series doors on page 46 are True Divided Lite doors, and on page 47 are SDL, or Simulated Divided Lite doors.

6-Lite SDL door shown here with Owl Grey Distressed finish, Royal sliding hardware, Monterey handle and Water glass.

Glass Texture Options

All glass used in these doors is a single-thickness, tempered safety glass. All Continental doors on page 46, and all SDL doors on page 47 may be ordered with the 3 glass textures shown at right (Clear, Flemish, Rain).

CLEAR

1 - PRIVACY RATING

LARGE FLEMISH

5 - PRIVACY RATING

RAIN

9 - PRIVACY RATING

WATER

3 - PRIVACY RATING

In addition to these 3 textures, the SDL doors on page 47 are available with Water glass texture shown at right.
