DOOR COMPANY

THE WOODCRAFT DOOR COLLECTION by GlassCraft Door Company

How To Use This Catalog

This catalog offers pictures and descriptions of GlassCraft's entire offering of our award-winning WoodCraft series doors. To quickly and easily find additional information for individual doors, such as pricing or door options, scan the QR Code at the bottom of each page with your phone or tablet. This action will take you directly to the on-line catalog page that you scanned, and this page has additional product information. Alternatively, you can access this catalog page on our web site with your computer.

As you access the online version of this catalog, you may click any individual door image, which will then open additional windows listing pricing, door options, available colors and sizes, pre-hang information, etc. for each door.

Make it your own special door

WoodCraft Mahogany and Knotty Alder entry doors offer unique and premium products at an affordable price. A harmony of design, craftsmanship, durability and affordability, WoodCraft hardwood doors provide an excellent choice for that perfect entry door. Follow these steps to create a customized door just for you.

1. Choose your door profile and wood specie. Mahogany or Knotty Alder? A solid door with a speakeasy or a contemporary door with lots of glass? A single door, or a double door with a transom?

2. Based upon the door profile, choose your door type. Portobello Mahogany...DoorCraft Mahogany...Estancia Knotty Alder? Three different door series offer unique advantages and benefits. See page 3.

3. Choose your finish color. Three finish types are offered, each in several colors. Traditional, Antique, and Distressed finishes will offer the perfect look for your home, and extend the life of your door. See pages 4-7.

4. Add options. Add rustic clavos (decorative door nails) and iron door straps to complete your unique look. See page 8.

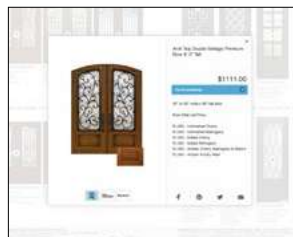

5. Select your hardware. Finish your door with solid cast-brass door hardware in single or multipoint options. See pages 12-17.

Accessing The Catalog

Step 1

Scan the QR Code at the bottom of the catalog page with your Mobile device. The online version of that page pops up.

Step 2

Click on the + sign to get a quick pricing overview. From this page, click on More Details button to view the details page.

Step 3

View the detailed product page with info on options, pre-finishing, door slab and pre-hung pricing.

44 Years of Beautiful Doors

Founded in 1977, GlassCraft Door Company has focused on quality and value for 43 years. Our company has grown into a premier manufacturer of premium entryways in the USA.

Unique door products are what we are all about. Years of experience and research have resulted in 20 patents and hundreds of unique products, which allow us to offer a broad selection of value-driven products.

From our 210,000 square foot manufacturing facility in Houston, Texas, our teams of dedicated artisans, designers and master craftsmen have created a selection of the most beautiful hardwood, fiberglass and wrought iron and steel entryways available. Our dedication to excellence is built into each product and continues with industry leading customer service and product warranties.

Cover photo shows an 8'0" tall DoorCraft Mahogany 3/4 Lite SDL 6 Lite door with Winter Antique finish, Antique glass and Zenia handleset. See page 63.

THE WOODCRAFT DOOR COLLECTION - Choose your door series

Estancia® Knotty Alder Series

The Knotty Alder Estancia® Series offers a beautiful rustic look and a wide array of finish options. We use real Knotty Alder sustainable hardwood from the American Pacific Northwest (and not a tropical imitation wood). This is a light colored hardwood with mineral streaks and surface knots, and it features a rustic finish when stained and sealed. These doors are offered in 1-3/4" thickness, 2 heights (80" and 96"), and 3 widths (32", 36", 42"). See pages 4-7 for factory finish options. For more information on the construction specifications of our Estancia Knotty Alder doors, please refer to our product information guides found at www.glasscraft.com.

Please note: Knotty Alder, like all hardwood species, varies in color, graining, and appearance. This variance is one of the natural features of a true wood door and adds to its beauty and authentic appearance.

Door at right is an Estancia Knotty Alder 6'8" tall 2 Panel with speakeasy, straps & clavos. See page 25.

Portobello® Mahogany Series

The Mahogany Portobello® Series offers our widest selection of hardwood doors, sidelites and transoms, our best wood-door warranty, and they feature our unique engineered-core technology. Most Portobello doors feature wide raised moulding and thick raised panels. Mahogany is a red-brown hardwood that will vary from rich golden to deep red-brown colors and has a beautiful finish when stained and sealed. These doors are offered in 1-3/4" thickness, 2 heights (80" and 96"), and 3 widths (32", 36", and 42"). See pages 4-7 for factory finish options. For more information on the construction specifications on our Portobello Mahogany doors, please refer to our product information guides found at www.glasscraft.com.

Please note: Mahogany, like all hardwood species, varies in color, graining, and appearance. This variance is one of the natural features of a true wood door and adds authentic beauty and warmth.

Door at right is an 8-foot tall Portobello Mahogany 3/4 Lite with Charleston wrought iron. See page 46.

DoorCraft® Mahogany Series

The Mahogany DoorCraft® Series provides a broad and economical selection of doors including wrought iron, decorative glass, SDL, and solid panel options, plus many TDL or true-divided-lite doors in a wide array of finish options. Some DoorCraft doors include raised moulding (which are narrower than the Portobello and Estancia mouldings). Mahogany is a red-brown hardwood that will vary from rich golden to deep red-brown colors and has a beautiful finish when stained and sealed. These doors are offered in 1-3/4" thickness, 2 heights (80" and 96"), and 3 widths (30", 32", 36"). See pages 4-7 for factory finish options. For more information on the construction specifications of our DoorCraft doors, please refer to our product information guides found at www.glasscraft.com.

Please note: Mahogany, like all hardwood species, varies in color, graining, and appearance. This variance is one of the natural features of a true wood door and adds authentic beauty and warmth.

Door at right is a 6'8" tall DoorCraft Mahogany Craftsman X Panel 1 Lite door. See page 57.

CHOOSE YOUR FINISH AND COLOR

DURALAST™ Wood Finishing Advantage

GlassCraft has developed an innovative and environmentally sound factory finish option for your door and complete entryway. DuraLast, our exclusive 10-step finishing system applies beautifully colored wood stains while adding multiple protective layers of crystal clear urethane finish coats to your wood door. Each coat is impregnated with ultraviolet UV-inhibitors and additional moisture blocking technology to keep your door looking beautiful. This system produces a finish to complement the inherent beauty of the Mahogany and Knotty Alder wood species.

The DuraLast process involves the deep penetration of tinted solution into the deep layers of each wood cell to prevent water or moisture absorption. The wood door is also processed through a laser-controlled convection-oven cure not just once, but three times to ensure the perfect wood surface curing.

GlassCraft Door Company's finish department is certified by the TCEQ (Texas Commission on Environmental Quality). The TCEQ's mission is to protect human and natural resources consistent with sustainable economic development, with a goal of clean air, clean water, and the safe management of waste. GlassCraft's manufacturing finish facility is inspected and certified by the TCEQ (registration number CN603390188). This is one more way GlassCraft is helping to provide you with information needed to make an environmentally informed purchase.

Traditional Finish

Our Traditional finish has been designed to maximize the beautiful rich Mahogany and Knotty Alder wood with a long-lasting 10-step finish process. See page 5 for all Traditional stain colors.

Antique Finish

Our Antique finish options feature the deep rich patina that enhances the warmth and antique character of wood, without the additional distressed markings and patterns. See page 6 to see all Antique finish options in Mahogany and Knotty Alder.

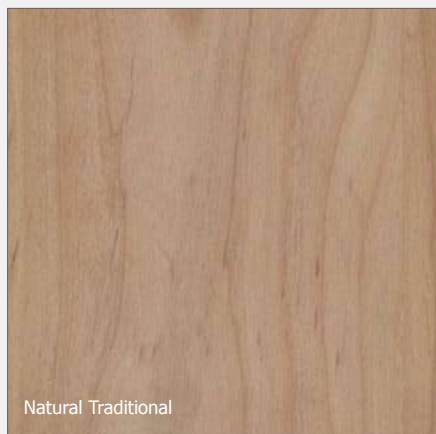

Distressed Finish

Our Distressed finish provides that special antique patina with distinctive distressed markings and patterns that enhances the aged beauty of wood. This finish is made with a 12-step process that adds a textured surface such as faux indentations, pits, cracks, scores, and wormholes. See page 7 for all Distressed finish options.

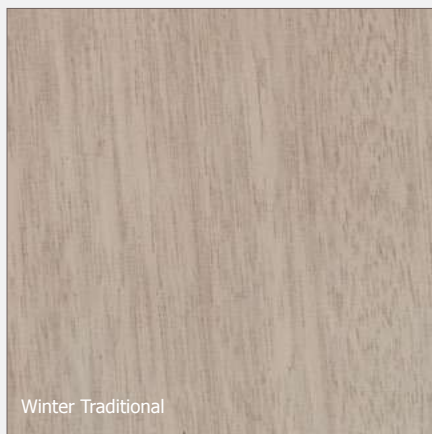

Important note: The images of all finish options shown on pages 4-7 and throughout this catalog offer only an indication of the final appearance and due to the natural variations in the texture, grain, and color of wood, the actual appearance will vary. All finishes will require periodic maintenance.

DECORATIVE IRON DOOR STRAPS & CLAVOS

Decorative Clavos Series

Decorative "clavos" or door nails can be mounted on the face of a door to give it a rustic or antique look. They can be mounted on the interior or exterior or both sides of a door*, and they may be used with or without the door straps shown at right. Because these are hand-cast and handmade, they will vary slightly in appearance.

Wrought Iron Straps Series

*NOTE: Manufacturer mounts clavos & straps to the exterior of the door only in the factory. If they are ordered for the interior of the door, items will be sent separately to be mounted by the customer.

PRE-HUNG OPTION & ADVANTAGES

PRE-HUNG ENTRYWAYS WITH CONTINUOUS SILL

PRE-HUNG OPTION

All doors in this catalog may be ordered as pre-hung door units. Part numbers & images for pre-hung door options are available in our on-line catalog – refer to page 2 for info on how to access this information.

All entryway configurations available for hardwood doors include “continuous” one-piece sills. This means that the bottom sill or threshold is made from one continuous piece of threshold material, which adds strength and prevents leaking under the entryway. This assembly design is especially important in configurations that include 1 or 2 sidelites. Other manufacturers may produce this entry configuration using a “boxed” construction method with separate sills for each sidelite.

GlassCraft uses a 1-piece sill construction method for reinforced strength and enhanced appearance.

Doors shown at left are Portobello Mahogany 3'0" x 8'0" double doors with Flemish privacy glass. See page 30.

PRE-HUNG COMPONENTS

Standard Pre-hung entryways include the following:

- 4-9/16" Jamb Legs
- Header
- Standard Sill
- Anti-Rot Sill End Caps
- Ball-Bearing Hinges
- Weatherstrip
- T-Astragal (where applicable)
- Flush Bolt (where applicable)
- Mull Posts (where applicable)

Optional Pre-hung components at extra charge:

- 6-9/16" Jamb
- Custom Jamb Widths up to 10" wide
- Brick Mold
- Sub-Casing
- Interior Casing
- Endura Sill
- Door Sweep
- Door Bore
- Strikejamb Reinforcement

Use your cell phone camera
or QRC scan app to **SCAN**
for More Information>

DOOR FRAME AND HINGE OPTIONS

Hardwood Door Frames with STRIKEJAMB™

Mahogany and Knotty Alder pre-hung doors are available with a steel-reinforcement StrikeJamb™ as an option.

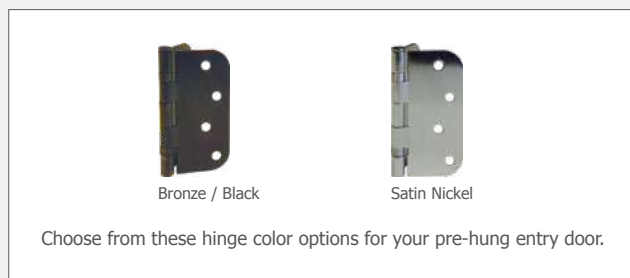

Pre-hung units include jamb legs, T-astragal (for double doors), standard sill, header, weatherstripping, and adjustable threshold, plus 3 ball-bearing hinges on 6'-8" tall doors and 4 ball-bearing hinges on 8'-0" tall doors.

The StrikeJamb™ reinforcement can be installed on the lock side jamb leg for safety and security. This plate reinforces the jamb leg, and allows the deadbolt and the handleset bolt to throw so that the bolts extend through the corresponding holes in the steel reinforcement plates. In addition, long mounting screws should be used with this StrikeJamb, these screws extending through the jamb leg, then through the steel plate, and finally into the wall studs.

Image at right shows the reinforcing plate from the back jamb leg side.

Hinge Color Options

All pre-hung units use 3 ball-bearing hinges on 6'8" tall doors and 4 hinges on 8'0" tall doors. 1-3/4" thick doors use 4" hinges. Choose from the two hinge color options shown at left for your pre-hung entry door unit: Bronze / Black, or Satin Nickel.

Construction Door Options

All standard pre-hung entryways in all configurations are available with a temporary "construction door" as an option. Using this temporary door, the permanent door will not be damaged during house construction. Construction doors are available for double-door and arch top and round top double doors also. Both hollow core and solid core construction doors are available.

Construction Door Part Numbers:

TEMPDOOR1 - Hollow Core 3'0" x 6'8" x 1-3/4"
TEMPDOOR5 - Hollow Core 2'8" x 6'8" x 1-3/4"
TEMPDOOR10 - Solid Core 3'0" x 6'8" x 1-3/4"

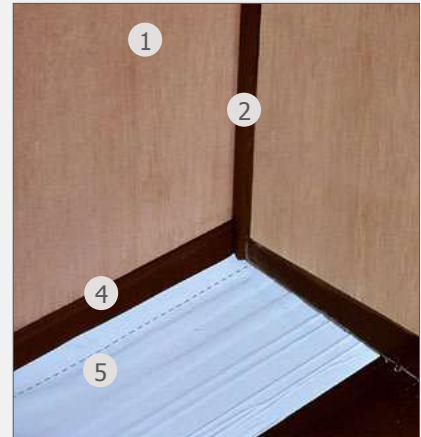

TEMPDOOR2 - Hollow Core 3'0" x 8'0" x 1-3/4"
TEMPDOOR4 - Hollow Core 2'8" x 8'0" x 1-3/4"
TEMPDOOR7 - Hollow Core 3'6" x 8'0" x 1-3/4"
TEMPDOOR9 - Solid Core 3'0" x 8'0" x 1-3/4"

JAMB LEG & SILL OPTIONS

Jamb Leg and Mull Post Rot Protection Included

GlassCraft entryways utilize our unique protective threshold end caps, which are hard rigid plastic parts machined to perfectly match the profile on the bottom edge of a jamb leg. We also use mull post caps at the bottom of all mull posts which are positioned between doors and sidelights. This method of assembly inhibits the hardwood jamb legs and mull posts from rotting over time due to the absorption of water up from the bottom edge of the entryway.

| 3 | Hardwood Jamb Leg | 6 | Hard Plastic Jamb Leg Bottom |

Images show the bottom corner of door (1), sill (5) and jamb leg (3) (6).

Sill and Sill Color Options

All standard pre-hung exterior door units use adjustable composite sills that help prevent water penetration, rotting, warping, and discoloration. Our standard adjustable composite sill includes a peel-off protection film which protects the sill during the house construction, and is made from 100% composite and aluminum materials. The "adjustable" feature allows the top of the sill to be adjusted with a screwdriver to match the correct height required for the bottom of the door. Optionally, you may select the Endura® brand adjustable composite threshold or an ADA threshold. The ADA threshold is approved for use with wheelchairs. ADA sills are 5" x 1/2" or 7" x 1/2". The Endura Z-Series Sill System (for an extra charge) provides a walnut colored sill cap, the adjustable feature, and a hard plastic protective construction cover.

STANDARD SILL with Composite substrate that will not warp or rot. Available in both bronze and mill finish.

OPTIONAL ENDURA brand threshold is available in both Bronze and Mill Finish, and includes a removable hard protective construction cover.

OPTIONAL ADA threshold. Available in Aluminum mill finish only.

BUFFALO FORGE[®] brand CAST BRONZE & BRASS ENTRYSETS

Single or Multipoint Hardware features Cast Bronze or Forged Brass Handle Set & Lock Options

Our BUFFALO FORGE brand lock sets are produced by hand-made processes utilizing molten sand-cast bronze or forged brass, and feature solid construction and precision engineered lock mechanisms. These are large lock sets with long escutcheon trim plates and they give a very heavy and strong, secure feel. Excellent design and style, with several models available for different door designs. This hardware has the look and feel of hardware costing three times the price. All use a standard Y1 Keyway. Two keys are provided. 2-3/8" backset.

All of the lock sets shown on the following two pages are available with standard 2-point models (latch and deadbolt), or with a multipoint deadbolt. All lock sets are available with matching "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanism, no key hole, and no thumb latch and are mounted on the "inactive" door, with two-point or multipoint lock sets used on the "active" door. See example photo on page 14 of Dummy Set.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included for either installation including 2 lever latches. Installation into the door slab and jamb is included in the price of all of these standard and multipoint lock sets. All Buffalo Forge entrysets will fit all full-sized doors in this catalog.

- Each Buffalo Forge lock set is available in 2 of 4 colors: Dark Bronze or Oil Rubbed Bronze and Satin Nickel or Antique Nickel.
- Included with these Buffalo Forge lock sets are the lock cylinder, deadbolt, matching screws and face plate(s).

Housing, lock cylinder, and 2 keys

Deadbolt latch kit

Matching screws

casting the escutcheon plate

Buffalo Forge Multipoint Option

An excellent option for all Buffalo Forge handle set models on the next 2 pages is our multipoint deadbolt.

It functions exactly the same as any deadbolt, making this very intuitive and easy to operate. Instead of just 1 deadbolt, we offer this option that provides TWO deadbolts, adding a significant amount of security and strength to your entry door. In addition, this creates a tighter weather-seal, and helps to prevent against door warpage.

- 18-1/2" spacing between deadbolts
- Face plate is approx 24" long x 5/8" wide
- 1" deadbolt throw
- Stainless steel construction of mechanism
- Bronze cover plate and strike plates

This option will work on any handleset shown on the next two pages. Installation into the door slab and jamb is included in the price.

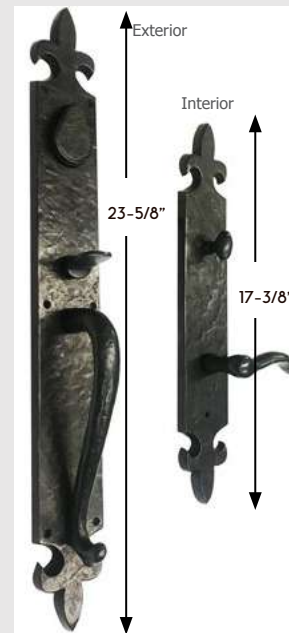

Door shown above is a 6'8" Craftsman Mahogany 4-Lite, 2-Panel door with Rustic Arch handle and multipoint option.

BUFFALO FORGE® CAST BRONZE & BRASS ENTRYSETS - LEVER LATCH

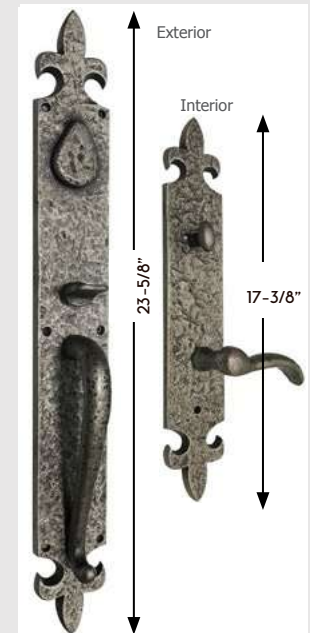

Features & Benefits

- Six designs, each in 2 colors
- Made of sandcast bronze or forged brass
- 5-1/2" center-to-center boring
- Single cylinder function only
- Requires standard 2-1/8" diameter borings
- 2-3/8" backset
- Fits doors with thickness of 1-3/4"
- Swinging key flap on exterior plate
- Includes all operating parts and fastening hardware
- Left or right handing
- Dummy Sets available for each
- Dummy hardware does not include thumb latch or key flap
- Knobs available for interior to replace levers (see next page)

ROCKWELL brand CAST BRASS ENTRYSETS

Single or Multipoint Lock Sets Add Security – Forged Brass Handle Set & Lock Options

These lock sets are produced by the traditional drop-forged process utilizing solid brass, and featuring heavy gauge construction, a precision engineered mechanism, and superior corrosion protection. All use a standard 5 pin SCI Keyway. Wide bow keys are provided. 2-3/8" backset only.

All of the lock sets shown on the next two pages are compatible with the multipoint lock systems shown below. In addition, the **Windsor**, **Savoy**, and **San Jose** are also available as "one-point" traditional lock sets for both 6'8" and 8'0" tall doors. And all lock sets are available as "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanisms and are mounted on the "inactive" door, with one-point or multipoint lock sets used on the "active" door.

The **Sapphire** multipoint and dummy lock sets are also available with a special "PVD" coating on the handle set and stainless steel for the multipoint mechanism for use in coastal installation applications. These are noted as "Coastal" in the item descriptions. This PVD Physical Vapor Deposition coating is harder, more resistant to corrosion and abrasion, and provides a longer-lasting coating when used in coastal areas.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included. Installation into the door slab is included in the pricing of all of these one-point and multipoint lock sets.

Rockwell Multipoint Option

Increase security and peace of mind with Rockwell's multipoint lock option with deadlocking tongues built to work with traditional grip hardware. Choose from any of the multipoint handle set trim options shown on the next 2 pages. This multipoint system is activated with the turning of the deadbolt lock. All 3 locking points are engaged only when the deadbolt point is locked by turning the thumb latch.

This multipoint lock set includes an anti-saw and kick-proof center deadbolt for maximum security and a 90-degree consumer friendly locking operation, so you visually know the door is locked when the deadbolt knob is in the horizontal position. In addition, these multipoint assemblies are produced using heavy-gauge steel with a zinc dichromate finish per ATSM-8633 testing standard. Stainless steel models are available for both 6'8" and 8'0" sizes for coastal installation.

Multipoint lock systems use our standard flush bolts installed on the passive door of a pre-hung double door, which gives the homeowner the option to include dummy handle sets on the passive door with all multipoint lock sets.

Precision-engineered components reduce the need for service calls, providing years of trouble-free service. These multipoint assemblies have been cycle-tested to exceed 300,000 locking cycles. Adjustable strike plates allow for field adjustment during and after installation. The design of these multipoint systems allows for right hand or left hand installation with the same part.

GlassCraft provides installation of the 3-point lock mechanism into the door, and installation charges are included in the cost of these lock sets. Installation involves precision machining of the edge of the door slab, which is performed with CNC machines to ensure precision.

When ordering for double doors, only 1 multipoint lock set is required. You may choose to include a "dummy" handle set on the inactive door for appearance purposes.

Door shown above is a 6'8" Arch Lite New Orleans decorative glass and multipoint Windsor lock set.

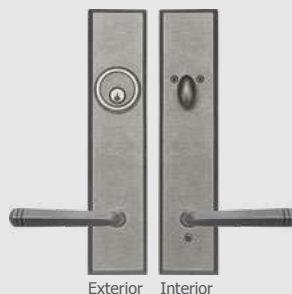

ROCKWELL CAST BRASS ENTRYSETS - LEVER LATCH

Features & Benefits

- Solid brass, heavy gauge construction with precision-engineered mechanism
- Compatible with multipoint lock system (page 15)
- Available with one-point lock sets for 6'8" and 8'0" doors (for Windsor, Savoy, and San Jose)
- Dummy lock sets available for inactive door in a double door entryway (no internal mechanism).
- Special PVD coating option on multipoint and dummy locksets (for Satin Nickel Sapphire)

WOODCRAFT PERFORMANCE & WARRANTY

Windstorm Approvals for Pre-hung Doors

Most of GlassCraft's premium Mahogany and Knotty Alder entryways have been evaluated for compliance and are approved for installation in designated catastrophe areas along coastal zones when installed as required and as specified. Both 6'8" tall and 8'0" tall entryways have been assigned Design Pressure "DP" ratings for a variety of entryway configurations, including single doors, double doors, single doors with 1 or 2 sidelites, and entryways with all transom configurations. Both Speakeasy doors and doors with glass have been approved with in-swing and out-swing configurations. These wood doors are not approved for hurricane impact, however many of our FiberCraft Premium Series doors ARE approved for impact. You should inquire with your local building authorities to ascertain the required DP rating for your area. Then visit www.glasscraft.com/testing.asp to determine which doors are available for you.

Look for the WINDSTORM RATED logo (shown at right above) throughout this catalog to see which doors are rated for Windstorm Approval. Be sure to check our online WoodCraft Door Catalog for the most up-to-date approval information.

Warranty for WoodCraft Entry Doors

The exposure to environmental conditions is a dominant factor in the lifespan of a wood door. Not all applications are appropriate for wood doors; wood doors require protection from environmental conditions and must be installed in a protected opening with adequate roof overhang. The minimum roof overhang needed is one in which the roof overhang projects out a distance from the structure no less than one-half of the elevation difference between the bottom edge of the door and the base of the overhang's highest point above the entryway. For complete installation, finishing and maintenance requirements for your wood door please read GlassCraft's Guidelines for Your Hardwood Door.

Visit our web site at www.glasscraft.com to download a copy of our wood door Warranty and Guidelines.

In addition, check our website to view our WoodCraft Door Care Guide to see our suggested guidelines on installation and how to care for your wood door:

<https://www.glasscraft.com/resources/installation-finishing-care-guide/>

6'8" DoorCraft Mahogany 6 Panel Door (see page 24) with Windsor Satin Nickel handleset, shown in Cinnamon Antique finish.

SOLID PANEL & PLANK ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION SOLID PANEL & PLANK DOORS

Solid Panel & Plank Doors

The Solid Panel and Plank Mahogany and Knotty Alder series of doors, sidelites and transoms provide an impressive range of options and finishes.

Doors feature laminated, engineered stiles and rails to virtually eliminate warping. DoorCraft Series, Portobello Series and Estancia Series panels are constructed using a 5-piece assembly that incorporates a cross-grained, multi-layer spline to eliminate panel splitting. Doors are assembled using an authentic doweled cove-and-bead technique.

Factory Finish Option

Choose from 27 finish colors in our Traditional, Distressed and Antique finish options. See pages 4-7 for Mahogany and Knotty Alder factory finish options.

Pre-Hung Option

GlassCraft doors may be ordered individually, or as assembled, pre-hung units in matching Mahogany or Knotty Alder jambs for exterior applications. Please refer to our online WoodCraft door catalog for details information, pricing, and available configurations.

Decorative Straps & Clavos Options

See page 8 for full details on GlassCraft's handmade decorative wrought iron Hinge Straps, L-Straps and T-Straps.

Use the decorative door straps for installation onto the face of a door to give it a rustic or antique look. Door straps can be mounted on the interior, the exterior or both sides. Straps may be used with or without the clavos shown on page 8. These door straps are hand-crafted and therefore vary slightly. Iron straps include handmade mounting nails.

Iron straps, clavos and speakeasy grilles may be packaged separately and uninstalled on all unfinished GlassCraft door products so the door may be finished before the iron straps, clavos and speakeasy grilles are installed.

V-Groove Option

Some Estancia Knotty Alder and Portobello Mahogany door panels may be V-grooved to give the look of a rustic door. V-grooving gives a "plank" appearance to the door panel. The quantity of V-grooves varies with the width of the specific door.

Peephole Viewer Option

Add a peephole to your solid entry door and get a 180 degree view of your outside perimeter. Available in 2 colors — Brushed Nickel and Oil Rubbed Bronze.

Knotty Alder V-Grooved 2 Panel Arch door with Florentine Speakeasy, Hinge Straps and Round Clavos.

Peephole for solid panel doors

The WOODCRAFT COLLECTION SOLID & PLANK DOORS

Speakeasy Grille Options

Most of our solid panel doors shown in this section may be ordered with our "speakeasy" option installed (see photo below). With this option, a small, operable rectangular door is installed in the upper door panel at a height of approximately 5'-6" (speakeasies are installed lower on round top double doors). This small door is hinged and latched from the interior side of the door. The speakeasies are available in 4 wrought iron grille designs.

Close-up photo of speakeasy on a Knotty Alder door with Florentine grille, finished in black.

Speakeasy Glass Options

Choose from 6 different glass texture options to complement your wrought iron and hardwood entry door. All glass textures shown below are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. The Water texture option offers a light obscured view or level of privacy. Flemish and Reeds glass options offer a moderate level of obscured view. Rain and Ocean give the highest level of privacy.

PRIVACY & PATTERNS GLASS ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION TEXTURED GLASS DOORS

Clear & Texture Patterned Glass Panels

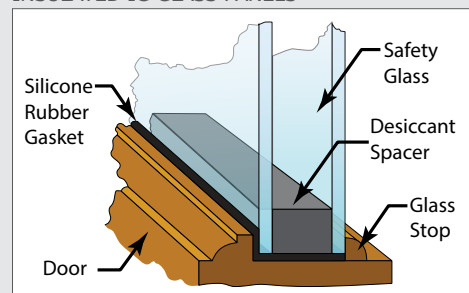

The hardwood doors in the clear and textured glass Privacy & Patterns Collection are available in Portobello Mahogany, Estancia Knotty Alder and DoorCraft Mahogany. These doors feature the simple and clean appearance of textured glass panels that can match a wide range of architectural styles.

All doors in this collection feature double-thick IG glass panels which offer security, energy efficiency and ease of cleaning.

Many doors in this section have matching sidelites and transoms available. Refer to the online catalog (see page 2) for more information on these sidelite products.

Choose from eight different glass texture options to complement your Mahogany or Knotty Alder door. Not every texture is available for every door in this section. All glass textures shown are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency.

DECORATIVE GLASS ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION DECORATIVE GLASS DOORS

Mahogany & Knotty Alder Decorative Glass Doors

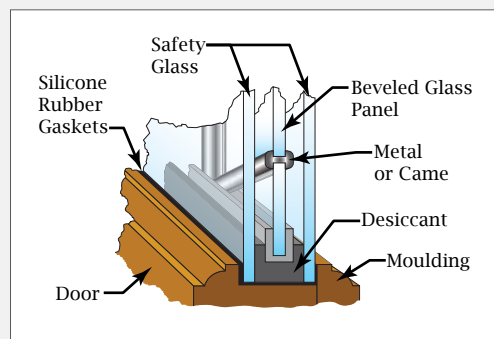

6'8" Mahogany 3/4 Lite door with Marsala glass pre-finished in Canyon Brown. See page 35.

The hardwood doors in this catalog section include our DoorCraft Mahogany, Portobello Mahogany, and Estancia Knotty Alder doors. The decorative glass panels are Quality Crafted™ in our workshops to ensure excellent craftsmanship and elegant designs.

Our decorative glass doors and sidelites feature triple-thick IG panels that permanently seal the decorative glass panel inside two sheets of tempered safety glass. These IG glass panels improve security, energy efficiency and protect the decorative glass panel from possible glass breakage.

Many doors in this section have matching sidelites and transoms available. Please refer to the online catalog (see page 2) for more information on these products.

PORTOBELLO CONTEMPORARY DOORS

WOODCRAFT COLLECTION

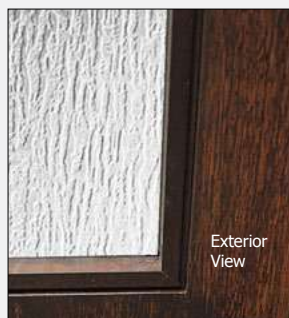

The WOODCRAFT COLLECTION CONTEMPORARY DOORS

Contemporary Portobello Mahogany Doors

The Portobello Mahogany doors in the Contemporary Collection offer a sleek, "retro" modern look. This collection is available in 9 designs that are featured in this catalog section.

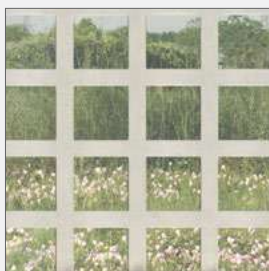

FEATURES OF THE CONTEMPORARY PORTOBELLO DOORS:

- Sleek modern look and minimalist design
- True Flush Glazed glass panels
- No raised mouldings
- Premium engineered wood core construction.
- Impressive range of options and finishes
- Available door widths 3'6" (8'0" tall only) 3'0", and 2'8"
- Available door heights: 8'0" and 6'8"
- Double glazed insulated safety glass
- Five glass options: Clear, Water, Reeds, Rain and Cloud
- Three metal grid options Matrix, Urban and Noble

Three Metal Grid Options (for doors in this section)

Choose from three different metal grid texture options to complement your contemporary mahogany entry door. The real decorative metal grids shown above are mounted between 2 pieces of clear glass as a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel and grid varies depending on the grid design chosen.

Matrix 4 - PRIVACY RATING

Urban 4 - PRIVACY RATING

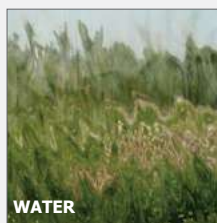

Noble 4 - PRIVACY RATING

Five Glass Options (for all doors in this section)

Choose from five different glass texture options to complement your contemporary mahogany entry door. The glass textures shown above are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The higher the privacy rating, the higher the level of obscurity.

8'0" tall Knotty Alder 2/3 Lite Door with Texan Wrought Iron, Slate Grey Distressed finish, Antique glass and Savoy handleset (see page 45).

WROUGHT IRON ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION WROUGHT IRON DOORS

Mahogany & Knotty Alder Doors with Wrought Iron

8'0" Mahogany 3/4 Lite door & 2 sidelites with St. Charles wrought iron grille, Reeds glass, and Savoy handleset, pre-finished in Slate Grey. See page 46.

The wrought iron mahogany and knotty alder series of doors, sidelites and transoms provide an impressive range of hand-made wrought iron grilles, door options and finishes. Portobello and Estancia Series doors with wrought iron feature an operable hinge option so that the iron grilles can be opened for easy cleaning of iron and glass. Or the grilles may be tightened for security. (DoorCraft doors with wrought iron do not offer this feature.) Matching wrought iron transoms and sidelites are available for many grille designs.

BEAUTIFUL OPTIONS:

- Choose your grille design and finish
- Choose your glass texture
- Add matching Sidelites or Transoms
- Add Decorative Straps, Clavos or V-Groove Option
- Choose your Traditional, Antique or Distressed finish color

Wrought Iron Straps, Clavos, and Operable Hinges

Optional Clavos & Straps

Optional Operable hinge

Operable grille*

- Add Decorative Straps & Clavos for a unique, rustic look. See page 8.
- Portobello and Estancia doors available with an optional operable grille hinge to allow grille to open.

Operable Grille Hinge Item #: WRH

The WOODCRAFT COLLECTION WROUGHT IRON DOORS

Glass Texture Options

Choose from 7 different glass texture options to complement your wrought iron and hardwood entry door. All glass textures shown below are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. Water and Antique texture option offer a lightly obscured view or level of privacy. Large Flemish and Reeds glass options offer a moderate level of obscured view. Rain and Ocean give the highest level of privacy. Not every texture is available for every door in this section. All glass textures shown are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency.

DoorCraft Series doors available with Clear, Ocean, and Rain textures only.

CRAFTSMAN / SDL ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION SDL DOORS

CRAFTSMAN, MISSION, BUNGALOW & SDL DOORS - Glass Texture Options

Choose from up to 5 different glass texture options to complement your door selection shown in this section, depending upon the specific door profile. Glass texture panels are produced using a double insulated glass unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

SDL Door Construction

The Simulated Divided Lite (SDL) doors in this section are constructed with interlocking muntin bars that lock into place for a stronger, more structurally sound assembly. Using advanced technology, the SDL assembly features precision-cut bars that fit seamlessly together for improved performance and appearance. Divided Lite muntin bars give the look and feel of historic and traditional divided lite doors, but with improved performance and energy efficiency. Divided Lite grilles create the illusion of True Divided Lite "TDL" doors by placing real wood muntin bars on the interior and exterior of one double insulated glass panel. Muntin bars are permanently fixed to the glass surface with special tape and are secured with pin fasteners to the glass frames at all points of contact. This allows for superior energy efficiency over TDL doors.

Bungalow Doors - Door Pegs

The Bungalow Doors found in this section include simulated door pegs as a standard feature. These door pegs offer an authentic appearance to this traditional door style. While the pegs are included with our doors, you may request that they be constructed without the door pegs.

Dentil Shelf Option

An option for Craftsman and Bungalow doors is the matching wood dentil shelf. For that true Craftsman look and architectural style, add this dentil shelf to your door for that extra bit of curb appeal. The dentil shelf is installed just under the top glass panel of the door and designed to add character.

TRUE DIVIDED LITE ENTRY DOORS

WOODCRAFT COLLECTION

The WOODCRAFT COLLECTION TRUE DIVIDED LITE DOORS

Real TDL in Estancia Knotty Alder & DoorCraft Mahogany

The TDL (True Divided Lite) series and Continental Series of Mahogany and Knotty Alder doors will complement a wide range of architectural styles. All doors in this section are True Divided Lite (TDL) doors, in which the glass panes are separate individual pieces of glass.

These Divided Lite doors may be ordered individually, or assembled in matching Mahogany or Knotty Alder jambs for both interior and exterior applications.

TDL DOOR CONSTRUCTION & PRE-HUNG OPTIONS

- Widths available: 2'6" | 2'8" | 3'0"
- Heights available: 8'0" | 6'8"
- Standard TDL doors use 1-7/16" muntin bars
- Continental Collection have wide horizontal bars
- Doors are assembled using authentic, doweled, cove-and-bead technique
- Matching sidelites available on many door profiles
- No raised mouldings
- Many TDL door profiles with double-glazed IG have been tested and approved in windstorm areas
